

# Barking Riverside Recycling Park

The Landfill Directive represents a step change in the way we dispose of waste in this country and calls for increased levels of recycling.

At Barking Riverside in the Thames Gateway in conjunction with English Partnerships, we are establishing a new 10,800 home community. The development is set to display high environmental benchmarks during construction, and in the completed scheme.

A recycling park has already been established that will treat imported materials for reuse on site. With a capacity of 350,000 tonnes and its proximity to the Greater London Boroughs, Riverside Park has the potential to be a flagship initiative not only in London, but nationwide.
