

Meden Valley

In partnership with Meden Valley Making Places (MVMP), we are embarking on a large regeneration project, in the Meden Valley area of north Nottinghamshire and Derbyshire developing five sites and building approximately 600 new properties. A major element of the scheme is to provide employment opportunities for local people. Training initiatives will boost local employment opportunities, and maximise local procurement so that the product of the regeneration project will not solely be better quality houses and a better environment, but also communities that are trained up, have better skills and consequently have more income to re-invest back into the community.
