

# North Solihull

At North Solihull we are engaged in a 15-year regeneration programme that seeks to address the economic disparities between north and south Solihull. The programme is being undertaken in phases with public consultation underpinning the regeneration programme. The local community is given every opportunity to view and shape development proposals prior to the submission of planning applications. We host public meetings and exhibitions, a series of publications are provided clearly explaining the development process and individuals rights. A drop-in centre has been established which is able to provide the local community with one-to-one advice. More recently, a website has been established providing information on-line to the local community.
